

This sheet is a Modification Aid, a list of the Most Common Modifications that have been encountered during MCA National Shows. This Modification list is double sided and the modifications available have been separated for Early (1964 – 1993) and Late Model (1994 – Present) cars. The Modification Aid is intended to be a Standardized list to assist in assigning points, and will help provide consistency and continuity of judging for the Modified Class entries during MCA National shows. Please bear in mind that the attached Modification List is NOT an All Inclusive list of every modification that is available to the owners.

The Aid provides multiple examples of modifications that are available and the points associated with each modification. Bear in mind that the points assigned for one modification item may be different than the points assigned for items considered a set. Example, a set of radiator hose covers is scored as one modification. There may be several hoses that are part of the cooling system that are modified, however each hose is not counted as an individual modification. Another example may be fender bolts under the hood. The fender bolts are considered a set and not counted individually when assigning points. There may be 8 fender bolts and they would be assigned 3 points total for the set. The number of pieces in the set and the points awarded are determined by highlighted bold text at the lower left side of each category of modifications except simple.

For any questions and clarifications on how to interpret this Modification Scoring Aid, contact the Assistant National Head Judge for the Modified Division.
